Mine Management Solutions

easing business... easing life!

Hykon, an ISO 9001:2000 company, is a pioneering presence in the field of power electronics with varied interests in Medical transcription, Information Technology, Solar Energy, Lights and so forth. Hykon Transcripts, part of the multi-core Hykon Group is an established IT-ITES company with its base in Texas, USA.

Hykon Minesoft is a powerful and highly customisable ERP software for mine production which can manage each and every activity of a mine regardless of the end product. It can be a mineral, rock, granite, coal or lime stone. This software is one of its kind and is a pioneering effort in Mine Production Control. **Minesoft** helps the mine management to find out the variance of the estimated production to the actual production. This application supports more than 10 branches at a time (optional). **Hykon Minesoft** is used in number of Mines/ Quarries with customers ranging from those with basic computer skills to people solving the most challenging strategic mine-planning issues.

Modules

General Administration

- + Mine Bio-data
- + Statutory Permission Forms
- + Inventory Management
 - + Product / Accessories Registration
 - + Purchase & Stock - (Explosives, Machineries & Accessories)
- + Vehicle Details
- + Various permissions

Minesoft enables any number of users with separate privileges. Multiple branch support enables you to manage the branches from a single location. Sophisticated inventory management and machinery tracking system keeps tracks of all accessories/spare parts as well as details of machineries.

Production Management & Logistics

- + Drilling
- + Blasting / Cutting
- + Excavating / Extracting
- + Crushing / Polishing
- + Transporting (Internal / External)

Advanced drilling/blasting details generates highly sophisticated reports of the mining process. A detailed vehicle report shows activity of a particular vehicle on any specific day or consolidated view provides a summary of all the trips.

Financial Management

- + Sales (Local/Export)
- + Vouchers & Ledgers
- + Invoices / Bills
- + Statements
- + Trial Balance
- + Profit & Loss Account
- + Balance sheet
- + Export to Tally Option (If Financial Management Module is not needed.)

All accounts are categorized under 4 heads viz. assets, liabilities, income and expenses. User can create any number of account groups and accounts. All the six types of vouchers i.e. receipts, payments, contra, credit and debit notes and journal entries can be entered through this interface.

Human Resource Management & Payroll

- ✦ Employee Registration,
- ✦ Attendance
- ✦ Wages
- ✦ PF / ESI details
- ✦ Other Benefits (Fringe)

Each and every employee details can be stored accordingly. Entering all employee details including designation, wages, performance assessment and history will help to analyze employee related activities

Reports

- ✦ Administration
- ✦ Inventory
- ✦ Production
- ✦ Finance
- ✦ Logistics
- ✦ Sales
- ✦ HR

This software provides more than 150 reports to enable the business/ mine managers to assess mine's performance. Highly scalable report filtration provides user an easy way to categorize the information.
